— PAINT PROTECTION FILM

EXO ARMOR 8™

Invisible armour. Lasting brilliance.

WHY EXO ARMOR 8

Protection you can't see. Confidence you can feel.

A high-performance, self-healing clear film that guards your car against rock chips, scuffs and light scratches, with a precise fit for your exact make and model.

01

Self-healing

An advanced top coat erases fine scratches and swirl marks when exposed to heat.

02

Crystal clarity

A crystal-clear finish that's virtually impossible to spot.

03

Precision fit

Patterns engineered for each make and model, for a seamless, tailored look.

04

Edge seal technology

Resists lifting and delamination, keeping dirt and contaminants out.

EVERYDAY WEAR ON PAINT

Crystal-clear finish	✓	✓	✓
Edge seal technology	✓	✓	✓
Best suited for	Smart-value protection for everyday driving	Balanced performance with a precision fit	Maximum longevity for premium and luxury cars

GOOD TO KNOW

Your questions, answered.

Does Exo Armor 8 need special care?

No special maintenance is required. Regular gentle washing, plus the care tips on this page, keeps the film performing at its best.

Can the film be removed later?

Yes. When it's removed professionally, the film comes off cleanly without harming your factory paint.

Will I be able to see the film on my car?

Hardly. The film is optically clear and virtually undetectable once installed, so your paint looks exactly as it should, only better protected.

CARE TIPS

- 01** Give the film time to settle. Skip washing for the first few days; we'll tell you exactly when it's ready.
- 02** Hand-wash with a pH-neutral car shampoo and a soft microfibre mitt.
- 03** Keep pressure-washer jets at a safe distance (about 30 cm) and away from film edges.
- 04** Wipe off bird droppings, bug splatter and tree sap as soon as you can.
- 05** Avoid abrasive polishes, cutting compounds and harsh solvents on the film.
- 06** Want it even easier to clean? Ask us about a ceramic top-coat over your PPF.
